

Take Me Home is a regional registry that promotes communication with law enforcement for those in our community who have certain disabilities, special needs, or medical conditions including, but not limited to, dementia, Alzheimer's, autism spectrum disorder or Down syndrome.

This tool equips law enforcement with essential information to more effectively communicate with special needs individuals, whether responding to a call at a residence or making contact in the field. It also serves as a valuable resource to help reunite at-risk missing individuals with their loved ones by maximizing search efforts and minimizing time it takes to access pertinent information to identify, find and safely take them home.

How does it work?

Families or caregivers can upload information about their loved one into the registry that would assist law enforcement when making contact with individuals in the field who appear to be disoriented, have special needs and/or are unable to effectively communicate. This information might include medical diagnoses, a detailed physical description, emergency contact information, known routines and behavioral patterns, along with an up-to-date photo. It also may include additional information such as calming techniques or communication ideas to get the individual home in a timely and safe manner.

Who should enroll?

Any individual with a disability, special needs, or medical conditions that makes communication difficult. Take Me Home is available to residents living within the Orange County Sheriff's Department jurisdiction. Any information shared with the registry will remain private and will only be accessible by law enforcement.

How do I enroll?

A family member or caregiver may obtain further information and enroll a loved one into the Take Me Home Program through the Orange County Sheriff's Department's website at ocsd.org/takemehome.
