## **Pedestrian Safety Starts with You: Stay Alert to Protect People Walking**

*September is Pedestrian Safety Month in California*

**Santa Ana, Ca (August 29, 2024):** September is Pedestrian Safety Month in California. The Orange County Sheriff's Department would like to remind drivers to slow down and be alert for people walking on our roads. By always taking extra precautions, you can help protect pedestrians and reduce the risk of crashes and injuries. Walking should always be an easy and safe option for getting around any community.

According to projections from the Governors Highway Safety Association, 7,318 pedestrians were killed in traffic crashes across the United States in 2023. In California alone, pedestrian deaths make up more than 27 percent of all traffic-related fatalities, highlighting the urgent need for increased awareness and safety measures on our roads.

"Every step we take towards greater pedestrian safety is a step towards saving lives," Orange County Sheriff's Department Sergeant Kyle Ishii said. "We want to remind everyone that safety begins with you, whether you're behind the wheel or on foot. Small actions, like slowing down, putting away distractions and yielding at crosswalks, can make a life-saving difference."

To promote the safety of people walking, the Orange County Sheriff's Department will conduct traffic safety operations throughout September focused on the most dangerous driver behaviors that put the safety of pedestrians at risk. These violations include speeding, making illegal turns, failing to yield and running stop signs or signals.

The Orange County Sheriff's Department offers safe driving and walking tips, including staying off the phone when behind the wheel or walking.

### Drivers

- Do not speed, and slow down at intersections. Be prepared to stop for pedestrians at marked and unmarked crosswalks.
- Avoid blocking crosswalks while waiting to make a right-hand turn.
- Never drive impaired.

### Pedestrians

- Be predictable. Use signalized crosswalks where drivers may anticipate foot traffic.
- Watch for approaching vehicles and practice due care crossing the street. At 30 mph, a driver needs at least 90 feet to stop.
- Make it easier for drivers to see you at night – consider wearing bright colors, reflective material, or use a flashlight when practical.
